Celebration of Poster Presentation Competition on the occasion Pollution Free Diwali

Diwali is the festival of lights that brings good luck, happiness and prosperity to all. The lighted lamps not only illuminate the environment but also have to shuck the darkness of poverty and ignorance. But the important question is how far are we able to understand and appreciate the real fact that we are moving away from the real spirit of the fiesta of light? The festival steadily but definitely is becoming one of the major problem for the environment due to the carelessness of the people all around.

Crackers contain toxic compounds like Copper and Cadmium and due to change in the weather these particles/pollution mixes with fog and becomes smog causing asthma attacks, bronchitis, symptoms of allergic rhinitis including running nose and headaches. Smog worsens the situation by suspending the toxic particles in the air for longer time.

It's high time that we people should recognize the problem and should build a roadway by which we can make a healthy and balanced environment.

This year, the Diwali got some extra sweet with the landmark ruling by the Supreme Court, an initiative to keep the city's ever increasing pollution problem in control.

After successful initiatives such as water-free Holi and Eco-friendly Gansesh Chaturthi, majority is going for Green Diwali. This Green Diwali is way to celebrate the festival with minimum consequences to the environment. With the bursting of loud firecrackers, the pollution in the country rises to the dangerous level causing discomfort to the elderly people, children and pets. More number of asthma cases gets reported with this increase in the pollution.

Let's come together and a do a bit for the society on this Diwali. It's our basic and most important faithfulness to understand the importance and essence of the traditional Diwali celebration. Let's take some steps ahead to make this Diwali an eco-friendly one.

So the poster competition was organized by NSS unit of Dr. J. J. Magdum College of Engineering Jaysingpur to celebrate pollution free Diwali. A total of 22 students participated in the competition. And the best three of them will be awarded certificates soon.
