Name of Activity: Competition of Ecofriendly Ganesh Decoration for all Shirol taluka Villages..

Day & Date: 31st August to 6th September, 2022.

Ganesh Chaturthi was celebrated all over India. Every year the festival starts and ends with great pomp and fun. The festival was celebrated for a period of 10 days. Ganesh idols are immersed into rivers or lakes. With the passion of celebrating this festival, we generally forget the hazardous impact of the immersion of idols on environment. The idol of Ganesh is generally made up of clay, Plaster of Paris (POP), plastic and cement. Toxic paints are also used in decorating the idol. After the immersion, the ingredients of the idols does not completely dissolve in water which then leads to environmental pollution.

In addition to this, these idols are often colored with bright paints that contain heavy metals such as lead, nickel, cadmium, and mercury. These heavy metals can affect the PH balance of the water; making it more acidic and thus further poisoning its inhabitants. Additionally, these materials can cause skin diseases in humans when they come into contact with the water, as well as poisoning us through the fish and birds eaten as food. That's why we NSS unit conducted competition for celebration of Ecofriendly Ganesh decoration competition for awareness of Environmental Protection.
