### Suggestion for institute

- There is a need to provide students, early in their college experience, with relevant labor market data, including job sectors that are growing, high demand skills, and educational requirements for particular jobs.
- There is also need to inform students about the career opportunities associated with each major and introduce them to alumni who graduated with particular majors.
- In addition, college might offer skills workshops to help students develop high demand skills and provide pre-professional advising and activities to better prepare them for advanced education or the job market.

-Regards,  
Namrata Patil.
